NATIONAL ROAD THRU MOTHER LODE

NEW MILL FOR HOGE DEV. CO.

Arthur W. Hoge has as week end visitors, C. L. Walther, chairman of the Board of Directors of the Hoge Development Company of Pittsburgh, Penn., and W. A Wyman, owner of the Pittsburgh News-Ticker Company, and Andrew Styer, a retired capitalist of Denver Colorado.

The controlling interest in the Hoge Development Company is held by these men and Mr. Hoge.

This Company with its extensive operations, have developed a a very large tonnage of exceptionally high grade ore, and have fully demonstrated the value by the shipment of over 300 tons to Selby's smelter which gave an average gross are to immediately install an tensive operations has developed a modern up-to-date oil flotation mill which it is claimed will save at least 97 per cent of all values as has been demonstrated by careful testing on the ore bodies.

The Company plans to sink their main three compartment shaft from the present 300 foot level to a depth of 600 feet, to open up lower ore bodies on the 450 and 600 foot levels. They will also continue exploration to the north and east on the 300 level, and open up new ore bodies in virgin ground.

The program of development which includes a new oil flotation mill will require the expenditure of $100,000. With this expense the Hoge Development Company will have perhaps the most modernly equipped new mine in the whole district, and a great majority of the best engineers and operators freely predict that it will eventually be one of the biggest and best producers in the Nevada City Mining District.

Active management is under the direction of Otto E. Schiffner, general manager; and Arthur M. Hoge, the secretary and teasurer of the company. Mr.Arthur W. Hoge is president of the company, and C. L. Walther is chairman of the board of directors, who are the largest individual investors in their large holdings.

This property is composed of over 1200 acres of which nearly all is virgin ground. This gives them room for long time production on ore of good values that are known to exist.

About 20 men are employed at the present time, and with the installing of the new oil flotation mill and added development work a much larger crew of men will be required.

0

SURFACE WORKS SIERRA MINE BURNED BY FIRE

Fire, starting Wednesday morning in an oil furnace explosion at the Yellow Jacket Mine near Alleghany caused the loss of the greater part of the surface works of the mine. Workmen underground were withdarwn, and the flames were kept from the mill and mine entrance.

The blacksmith house, compressor house, boarding house and bunk house were destroyed. The fire escaped to the surrounding forest, and was controlled by the forest service after it had burned over five acres.

The loss is estimated at upwards of $20,000.

The mine is on Kanaka creek, east of Alleghany. It has been a steady but hardly a notable producer as compared to other famous mines in this district.

The Tahoe National Forest headquarters placed thirty men on the fire, which was patrolled.

0

EARLYNE CLEVELAND IS REPORTED VERY ILL

Word has reached us that little Earlyne Cleveland, youngest child of Mr. and Mrs. Acton M. Cleveland is very ill. We hope for her a quick recovery.

The little sister, Geraldine, passed away about three weeks ago.

HOFF TAKES OVER THE KATE HARDY MINE

More evidence of the stimulated interest in the mines comes with the announcement from Wm M. Beggs of Oakland, that the Kate Hardy Mine consisting of five claims in the Alleghany District, Sierra County, has been bonded to J. M. Hoff and associates, who now are one of the largest operating groups in the Willow Valley District along Deer Creek adjacent to Nevada City.

The Kate Hardy is one of the best known mines in the Alleghany District and is located on Oregon Creek, two and one-half miles West of the town of Forest. The property, by reason of the immense size of the ledge, and the prominent outcrop of the vein, has attracted attention as far back as 1874, and through different periods of working, over a quarter of a million dollars has been taken out. The vein is a quartz fissure of the contact type and the vein system is paralled with what is known as the West belt of the serpentine. Assays show the ore runs around $21 per ton. There is a ten stamp mill on the property and the workings consist of four tunnels with a shaft 160 feet deep sunk from the lowest tunnel.

It is now proposed to equip the property with Oil Flotation System and inaugurate a program of new development.

0

MINING JOURNAL WILL BE READY FOR PRESS SOON

Final arrangement for the printing of the first issue of the California Mining Journal is being made at The Nugget office.

Reading matter is being compiled by some of the best writers in this section. A number of articles are already n hand including an excellent one from State Mineralogist Walter W. Bradley.

Field representative Richard Buhlis is doing excellent work in obtaining both advertising and subscriptions and reports that as soon as the first issue is off the press he will triple the business.

Nearly a hundred names are already on the list, coming from as far north at Washington and south to Los Angeles.

A special price of $1. a year is made to Nugget subscribers. The excellent quality of the two annual special editions which The Nugget has published assure the public of a high quality of publication.

0

MINING PERSONALS

James Grimes of Oakland who has been visiting relatives here for several weeks left Tuesday morning for Camptonville where he will visit his American Flag property.

George Fisher of the Mines Industrial Equipment Company, with quarters in San Francisco, spent the week end in this section.

A. R. Archibald of Grass Valley was a Nugget visitor this week. Mr. Archibald is recovering from a nevvous breakdown which has confined him to his home for the past three months.

L. A. Smith of the River Placers near Delhi mine was a Nevada City visitors recently.

Theodore C. Larsen of the Omega Mine, was a business visitor in Nevada City easly in the week.

Fletcher Hamilton, former state mineralogist was a recent Nevada City visitor.

P. S. Waldron, caretaker at the P. S. Waldron, caretaker at the Plumbago mine, was down on a short visit. Mr. Waldron was at one time store keeper at Graniteville, in the Moores Flat Section.

Edwin Letts Oliver, Harold Oliver and Dr. Sweet were visitors at the Idaho Maryland Mine Thursday. They were enroute from Tahoe to their homes in the bay region. Mr. Oliver is part owner in the Idaho Maryland mine.

INSTALLING NEW MINE MACHINERY

The mill capacity of the Murchie Mine is being increased by the installation of twenty stamps which were purchased from the Allison Ranch Mine. Ten of the new stamps are all ready in use and the other ten are being installed.

140 tons of ore are now being crushed daily in two shifts. The flotation plant which was installed two years ago is adequate to handle the increased amount of ore and is giving excellent satisfaction.

Tuesday a new Chicago pneumatic Tool Company 1000 cubic foot air compressor was received and will be installed by the last of the week. This will double the present compressor capacity.

The completion of the recently installed pump affords a capacity of a little more than double the amount being raised at the present time. The pumping equipment consists of four Byron Jackson centrifugal pumps capable of raising 500 gallons per minute each in two lifts against a head of 1200 feet.

A new change house 40X80 is being constructed as the old is entirely too small to accomodate the increased crew which now numbers 150 men.

The area below the mill is being cleared in preparation for the construction of an impounding dam for tailing storage.

The Murchie mine is owned by the American Foundation Company of which C. C Vn Lben Sels is president; O. E. McCraney is the superintendent in charge.

BOND IS TAKEN ON SIERRA MINE

A late report reaching The Nugget office is to the effect that the Primrose Mine in the Sierra City District, has been bonded to Seattle operators. The Primrose has been a producer at various periodn and is credited with a yield of $250,000 in gold. Reopening is expected to get under way in the near future.

A new saw mill was built during September and October of 1928 to be used in cutting timber for the mine and erecting bulidings.

A crew of ten men were employed at that time at the property.

0

PARTLY BURNS FLUME ON HOFF MINE PROPERTY

A small timber fire which broke out in the Willow Valley District above Nevada City last evening, which did considerable damage to the flume, which was recently built for the water supply of the St. Louis mine.

Most of the flume will have to be rebuilt, but a small pile of new lumber, which was saved, can be used for that purpose.

State Warden Will Sharpe was soon on the job however, and we can safely say, that (Bill) saved the day. Every effort was made to save the flume, but to no avail. Two men were left to guard it last night after it was pronounced saved.

0

Mrs. Joslin and two daughters of Sacramento are spending the summer here.

FARMERS AND MINERS JOIN TO CONSERVE CALIFORNIA WATER

The farmers of the valley have at last come to the realization that the precious water of the state is controlled by the mountain counties with whom they have been quarreling for the past half century. The dry season from which the state is now suffering has brought the agriculturist into the realization and he is turning hiseyes to the hills from whence will come his aid. He finds the long suffering miners ready to lay aside all grudge and to work hand in hand on a gigantic plan which will be a benefit to all concerned.

The recently completed tour brought to the eyes of the Congressmen the need of water conservation for California But Congress will do nothing until the state works out its own plan and they are assured that power trusts will not corral the water power ofht the state at their own figure.

The sum of $350,000,000 is needed to finance the huge plan which is three fold in its purpose.

First: The building of impounding dams which would allow hydraulic mining to be carried on. The Seawell Hydraulic bill which Governor Young vetoed called for an appropriation of $50,000 to carry on a survey of available sites for such dams. Governor Young in vetoing the bill said he felt the amount insufficient to do the necessary work and further he then had in mind the plan which is now being worked out.

Second: That the power be sold to power companies at a just rate to all so that the burden would fall on all shoulders equally.

Third: The water full of debris should be carried to the valley to use for irrigation purposes.

Thus the farmer and miner are uniting in a great struggle for their very existence. It is a case of "united we stand, divided we fall", and no one realizes it as potentially as the farmer himself.

0

GILMORES VISIT HERE

Mr. and Mrs. Chas. L. Gilmore of Sacramento were visitors here enroute from Downieville where Mr. Gilmore had been called on legal business.

Mr. Gilmore is the attorney for the Mining Association of California and was their candidate for the position of Director of Natural Resources, a position still unfilled by Governor Rolph.

The Call of the Great Outdoors

SCENIC HIGHWAY TO CONNECT WONDERFUL NATIONAL PARKS

AUBURN, GRASS VALLEY, NEVADA CITY, YUBA PASS TO BE PART OF BEAUTIFUL SCENIC ROUTE

That Nevada County as well as her sister Counties will be materially benefitted by the visit of the Congressional Committee to California was learned yesterday in an interview with Congressman Harry Englebright. Several months ago Congressman Englebright conceived the idea of a national highway which would link together the national Parks of California including those of his congressional district.

TO JOIN NATIONAL PARKS

Starting at the southern end with Sequoia National Park which, would be linked by highway with Los Angeles thence through Yosemite to Calaveras Big Trees. From there the highway would go through the famous Mother Lode, both colorful and historic in interest, thru Sierra Nevada and Plumas Counties to the Lassen National Park continuing from there thru the Modoc lava beds to the Oregon State line.

PLAN FEASIBLE ONE

The plan was favorably received by the committee as a most feasible one in as much of the route is largely built by state or national appropriations and there only remains the connecting links to build. These could be built over a period of not to exceed five years and would not be a burden to the federal government. Much of the route is within national parks or nationel forests and a large portion of the remainder of the route takes in state highways there remains very little road to be built under this plan

MOST SCENIC IN WORLD

The congressfen were most enthusiastic over the idea and said that in their opinion when completed it would be the most scenic in the world. Added to the scenic lure of the route would be the comfort of traveling thru the cool mountains in contrast to entense heat of the valley during the summer months.

500,000 ANNUAL VISITORS

500,000 persons annually visit the national parks of California and with the building of better roads into the parks this number will be increased. A very small portion of these find their way thru this historic section.

CONG. TRIP ENJOYABLE

Congressman and Mrs. Englebright joined the Congressional Party at Yosemite on July 8th. The congressmen composed of House Committee of the Department of Interior which has under its jurisdiction National Parks and approach roads to National Parks, Indian Relations and Reclamation Projects. Congressman Frank Murphy of Ohio was chairman of the committee and John O. Tilson, majority leader of the House of Representatives were in the group which numbered fourteen in all.

A matter of the spending of $30,000,000 in various projects was up for their consideration.

Two days were spent in Yosemite One day was spent as guests of the city of San Francisco in looking over the Hetch Hetchy water project

Stockton has the congressmen as luncheon guests and from there they were escorted to San Francisco where they were royally entertained with Mayor Rossi as host.

Governor Rolph received them in Sacramento and was host at a luncheon at El Paso Country Club.

The next stop was Redding from which point they visited Lassen National Park and the proposed Kennett Dam site.

Wednesday noon after luncheon as guests of Redding Chamber of Commerce Congressman and Mrs. Englebright parted from the committee and returned to their home here.

0

GRAND JURY HOLDS SESSION ON THURSDAY

In the case Mrs. Macari vs. Frank Rossi the Grand Jury brought in an indictment against Rossi for assault to kill and for carrying a concealed weapon.

MARY ANN HUSTLER PASSED TO BEYOND

Mrs. Mary Ann Hustler passed away at the Nevada City Sanitarium Tuesday afternoon. She underwent a major operation some time ago for an ailment from which she never recovered.

The body was brought from her home in North Columbia to the church in Cherokee where high mass was held for the repose of her soul. Interment was in the San Juan cemetery.

She was formerly Miss Mary Ann Brophy and was born and raised at Tyler near Cherokee. Her entire life has been spent in the vicinity of her old home.

The little home at North Columbia, her husband to whom she ministered with a loving care, her neighbors and friends in the little community whom she loved and who loved her, is where she will be so sadly missed.

She leaves to mourn her passing a loving husband three brothers, Frank Brophy of Oakland, and Pat Brophy of San Jose, M. J. Brophy of British Columbia. A sister-in law, Mrs. Roy McNamara, resides at Cherokee, besides several nieces and nephews.

0

HOWLETT AND PARTNERS WORKING ON PROPERTY

Charles Howlett of Lake City, William Lanninger of Nevada City, and associates are going ahead with their property preparing it for a bond and lease.

This is a gravel property composed of six claims situated near Lake City.

Howlett Brothers in the past took out a lot of gold and did a great deal of work on this property, it is said.

0

ARGO MINE IS TO BE DEVELOPED S F INTERESTS

Under a recently obtained lease and bond from W. D. McLean of Coulterville, Charles A. Gillis of Tuttletown and C. H. Holbrook, Jr., of San Francisco have resumed the development of the Argo mine, nine miles east of Coulterville. They have put a force of miners to work sinking a 200-foot winze from the bottom or 100-foot level of an inline shaft on an orebody showing a length of 100 feet and an average width of two feet that has plated it is stated $25 a ton in gold in the three-stamp mill on the property

0

PAINE BROS TO OPEN UP GRAVEL DEPOSIT

Paine Bros. have placed a wing dam in the South Yuba River on the lower part of their property near the Kennebec House, and are busily engaged pumping out seepage water.

The river is low and Henry and Herbert Paine decided to drain a large hole in the river that is filled with gold bearing gravel.

So far the work is slow but fair returns are being made from the gravel they are taking out each day

0

Mrs. Jennie Shearer has returned to her home here after spending four mosths with her sister in Hamburg, Siskiyou County.

WEATHER CONDITIONS PAST AND PRESENT

The following is copied from a Muntain Messenger of September 6 1884, and gives some idea of weather conditions at that time. The whole paper is of hand set type and carries a large number of advertisements, showing that it paid to advertise even at that early period.

HISTORICAL HOT SUMMERS

"People who are already complaining of the heat while this summer is scarcely a month old, says the XIXeme Siecle, should remember the extraordinary weather of former years. In 627 the heat was so geat in France and Germany that all springs dried up, and water became so scarce that many people died of thirst. In 879 work in the fields had to be suspended—agricultural laborers persisting in their labor were struck down in a few minutes, so powerful was the sun. In 993 the sun rays were so fierce vegetation burned as under the action of fire. In 1000 rivers ran dry under the protracted heat, the fish were left in heaps and putrefied in a few hours. The stench that ensued produced the plague. Men and animals venturing in the sun during the summer if 1022 fell down dying, the throat parched to a tinder with blood rushing to the brain. In 1132 not only did the rivers dry up, but the ground cracked on every side, becoming baked to the hardness of stone. The Rhine in Alsace nearly met with a similar fate. Italy was visited with terrific heat in 1139, and vegetation and plants were destroyed. During the battle of Bela, in 1260, there were more victims made by the sun than with wea-pons, men fell down sun struck in regular dows. The summer of 1277 was also severe, there being an absolute dearth of forage. In 1303 and 1304 the Rhine. Loire and Seine ran dry. In 1615 the heat throughout Europe became excessive. Scotland suffered particularly in 1625 —men and beasts died in scores. The heat in several departments during the summer of 1705 was equal to that in a glass furnace. Meat could be cooked by merely exposing it to the sun. Not a soul dared to venture out between noon and 4 P. M. In 1718 many shops ad to close—the theaters did not open their doors for several months. Not a drop of water fell during six months. In 1753 the thermometer rose to 118°. In 1779 the heat at Bologna was so great that a large number of people were stifled. There was not sufficient air for the breath and people had to take refuge under ground. In July 1793, the heat became about intolerable. Vegetables were burned and fruit burned upon the trees. The furniture and wood-work in dwelling-houses cracked and split up; meat went bad in an hour. The rivers went dry in several provinces during 1811. Expedients had to be devised for the grinding of corn. In 1822 a protracted heat was accompanied by storms and earthquakes. During the drought, legions of mice overran Lorraine and Alsace, committing incalcuable damage. In 1832 the heat brought about the cholera in France, and 20,000 persons fell victims to the visitation in Paris. In 1846 the thermometer marked 125° in the sun. Finally, the summers of 1859, 1860, 1869, 1870, 1874, etc., although excessively hot, were nt attended by any disaster.—London Standard."

Not long ago a desert miner told of being down in the desert near Randsburg when it was 128° at midnight. He said if you touched the rocks during the day time it would burn you.

This miner also told of buying water from the railroad company. They paid five cents a gallon for it at one station while it was only a cent a gallon at another. He used his water for sluicing for gold and it run into a trough, settled and he used it to the third time.

The moisture in the above countries must have had a lot to do with the heat as it is a well known fact at this time that if the thermometer raises to around 100° the people of the east and southern part of our own United States suffer and even die from it. The dry heat does not affect like the moist heat does.

FRENCH CORRAL ITEMS

FRENCH CORRAL, July 16, (Special to The Nugget)—Tuesday morning brought home tired and worn-out fire fighters, who, after battling with the fire demon through the day, remained to watch and guard during the night, at our stricken little sister village of Birchville.

Alas for Birchville. That lively little early day town of the San Juan Ridge group, conspicuous in every theory, where some of our best pioneer citizens builded homes, and reared their families and gave the best days of their lives. How sad the heart, to see it in ruins! and the beautiful surrounding woods now a mass of charred timber.

After a strenuous fight, the fire was gotten under control atBuckeye Hill, this side of Sweetland. During the week a fire has been raging near Bangor.

M. O'Connor and sister, Miss Catherine, made a trip to Nevada City Wednesday to see their cousin, Mrs. Wm. Hustler, (nee Mary Brophy), who has returned to the Nevada City Sanitarium. Mrs. Hustler underwent a serious operation several months ago, from which she rallied wonderfully. Recently symptoms set in for which she returned for further treatment.

Mr. and Mrs. Edward Rheberger and Miss Joy Neison of San Juan and Miss Rood of San Francisco visited the O'Connor family of Birchville Wednesday afternoon.

Mr and Mrs. P. H. Flynn of Nevada City visited friends in French Corral and Birchville Thursday. It made their hearts sad to look upon the ruins of Monday's conflagration. The Doyle place which was the home of Mrs. Flynn's childhood, and the schoolhouse where she spent her school days and where her children in their turn attended school, all endeared to her by so many happy memories, now a pile of ashes and cinders. Where is the heart that does not hold happy memories of the old schoolhouse.

Mr. and Mrs. W. E. Moulton, Mrs. J. McCarthy and Mrs J. W. Culver made a trip to Sacramento Friday.

Mr.and Mrs. J. Fogarty and Mrs. Fogarty's mother, Mrs. Jose Dalberg were visitors in Birchville Sunday.

Benton Wilcoxson of Drum Power House visited French Corral Sunday. On his return he was accompanied by his mther, Mrs. J. W. Culver, who will visit his family for a while.

Edward Fornier of Downieville called on relatives at this place Monday.

A Browning and son, Clyde, were home for a few days at the week's end. The mine in which they were working at Forest Hill was closed down on account of the fire at that place.

James Graham ofOakland was a visitor on the San Juan Ridge this week. The old Ridge is always dear to Jim especially the town of Sweetland where he was born and raised.

Mr. Dough of Marysville was in French Corral today.

Clyde Bishop and friend, J. Jewel, who have been spending the past two weeks in French Crral returned to their home in Oakland today.

—0—

FRENCH BROTHERS READY FOR THEIR OPENING DAY

French Brothers who are in the deying and cleaning business, have opened a branch establishment in Nevada City in the Ben Bost Building on Broad Street.

They bought out Mr. Lee Jeffrey who has conducted the business for about two years.

They have renovated and furnished the Bost Building and made it into a modern up to date place.

—0—

Mr. M. Wisler of Cherokee was a business visitor in Nevada City Monday.

You and I

by CHARLES S. KINNISON

LIFE'S ALLUREMENT

Oh, let me live in expectation
Of better days that are to be—
And work in sweet anticipation
That Fate some day will smile on me!
And let me hold a fighting sector,
Where I must drive to reach my goal—
Where I, at times, may sip Life's nectar,
But not too often drain the bowl!

And when the day has left me weary,
And I have failed to touch the prize—
May I maintain an outlook cheery,
And never fail to realize
The finest part of Life's attraction,
Lies not in climbing every slope,
Nor in that thing called "Satisfaction —
It lies in dreams, in faith, and hope!

SUBSCRIBE FOR THE MINING JOURNAL

By Joe M. Swazey

Three cheers for the Nevada City Nugget
They are pushing right ahead;
They're going to publish a Mining Journal
As I guess you all, have read.

'Tis the (California Mining Journal)
Oh! Man! won't it be great,
To be able to read what's doing
In mines all over our State?

The directors, all have pledged their support
To this new publication.
Let's pause a moment, and give three cheers
For the Mining Association.

The Nugget has always boosted for the mines
And has done all it could do;
So we all are glad, and we all hope
That, all their dreams come true.

So, Come on Friends, let's all be sports
Let's subscribe before it's too late
It will help to make this Journal,
The pride of our Golden State.

Aspir-Mint

Suffering? There's a new, pleasant, mint-flavored, tablet that relieves ordinary headache and neuralgia, muscular pains and functional pains. It's excellent for Coryza —cold in the head—and for the sore throat that often accompanies it.

Physicians have been writing prescriptions for a similar combination for years.

The Dr. Miles Medical Company has standardized this well balanced formula and is glad to offer it in the form of a stable, palatable, mint-flavored tablet for home use. Pocket Size 15c, Regular Package 25c

YOU'LL GET RELIEF—OR YOUR MONEY BACK

MINING PAPERS AND ADVERTISING

With deep regret we chronicled the passing of the Nevada Mining Press. It was all that a mining paper should be, except, perhaps, a money maker. Our news story said that its passing was "due to conditions affecting both the mining and publishing industries."

Down in Nevada, where they knew better, the loss was blamed by general newspapers on lack of support by the mining industry. The Goldfield News, for example, said

"When mining companies are developing they need the assistance of mining papers, but when they enter the production stage and are self-sustaining ,many of them forget the papers that helped them in their toddling days. Mining papers, one after another, have failed for lack of support from peple whose interest would be served by supporting them".

The weekly paper at Tonopah said:

"The decision of the publisher is a dirge to the industry on which the prosperity of Nevada was erected Reno has yielded to the glamour and easy money of gambling and divorce. Failure to support, that trite commonplace of the divorce courts furnishes the epitaph that has been carved on the tombstone..... and in the days to come the captains of industry will realize their serious error in permitting the Nevada Mining Press to join the great majority."

A mining paper properly has three functions to perform. It should be: (a) a purveyor of news and technical information to those actually engaged in the mineral industry; (b) a reliable guide to stockholders in mining companies and those who will provide the funds for future development; (c) an advocate of the legitimate interests of the mineral industry in its relations with the governments and the public.

In the past fifteen years the tendency has been for mining publications to become thoroughly commercialized—to become mere trade papers rather than spokesmen for the industry. West of the Rocky Mountains, this tendency was opposed in Nevada by the Mining Press and in the Northwest by Mining Truth. It is significant that the only states in which mineral development is not discouraged by unreasonable laws are Nevada, the home of the Mining Press, and Washington, Idaho and Montana, where Mining Truth has its principal circulation. And now the Mining Press is gone.

Commercialized mining papers have sought and won advertising, their principal source of revenue, on the ground that they reached only mine operators, and therefore offered limited class circulation to purveyors of mining machinery and equipment. Yet it should be obvious that paper which reaches only mine operators is of no particular value to the mining industry.

It should be equally obvious that companies serving the mineral industry will fare better in the long run by patronizing publications which strengthen the small operator, assist the growing company, and help in attracting fresh capital to open new mines.

CENTRAL HILL LODE MINE LEASED L A PEOPLE

San Andreas, Calif. July 16—B. J. Jeffrey of Los Angeles and associates have acquired under lease and bond from Thomas Jackson and W. M. Nuner of San Andreas, the Central Hill lode mine, embracing 40 acres, three and a half miles southwest of this town. They are installing a two-drill compressor and other necessary equipment for the renewed development of the property, which in past shallow operations has given a good accounty of itself. The new operators announce that work for the immediate future will be confined to the further extension of a crosscut tunnel, now 180 feet in length, with a view to intersecting an orebody of good value which on the surface shows a width of six to eight feet and a length of 60 feet. It is calculated that about 80 feet of additional work will be required in the tunnel to reach the objective point and that a vertical depth of 124 feet on the orebody will be gained.

A vein averaging 20 feet in width and assaying from $5 to $25 a ton in gold is being developed by Carroll Holmes, Los Angeles mining man, in operations recently inaugurated by him on his lode property two and a half miles west of Mokelumne Hill. An incline shaft has gained a depth of 40 feet on the vein, which is regarded as the extension of the main ledge of the famous Gwin mine, a half mile distant. Mr. Holmes is making preparations to push development work on an extensive scale.

TO SELECT FINEST OUT DOOR GIRL OF CALIF.

Salinas, Calif, July 16—Senator Bert A. Cassidy and Assemblyman Jerrold L. Seawell have been invited to serve as judges in the Contest to determine the Finest Outdoor Girl in California. The contest will be held on the morning of July 22nd, the opening day of the California Rodeo at Salinas. Practically every City of California will send to Salinas the girl that they believe should receive the designation and the winner will be presented a beautiful platinum and diamond ring by Governor James Rolph Jr.

The girls are judged on their personality, popularity—which means having been elected to office by fellow students—accomplishments, such as riding ability, swimming, golf, tennis, archery, music and dramatics, and General Fine Outdoor Appearance.

Governor Balzar of Nevada and many other notables will be guests during the Rodeo at Salinas, which will close July 26th.

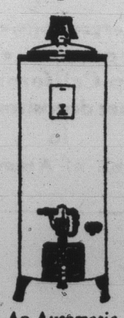
"Let's go Dad!"

Plenty of hot water *instantly* saves Mother's time for pleasure!

IT'S EASY to finish the housework in a jiffy when there is an abundant supply of hot water. Each day you save countless minutes. Each week there are additional hours for motoring, shopping, or other pleasures.

No Need of Watching the Automatic Gas Water Heater

With an automatic gas water heater a thermostat turns the gas on and off. It keeps the water at 140 degrees day and night. At any instant you can have deep hot water for bathing, a basinful for shaving—just as in the fine hotels and apartment houses. The water in the tank stays hot because the tank is insulated. No gas wasted.



An Automatic Gas Water Heater

This instant hot water service costs less than one-fifth of a cent per gallon —the lowest cost of any method for heating water in the home.

You can have this instant hot water service installed in your home for a few dollars down, balance in easy monthly payments. For full details telephone or call at our office.

Local dealers also sell Automatic Gas Water Heaters

EARLY RECORDS SHOW DIFFICULTIES EARLY MINES

According to the court house records the first mine taken up in Siskiyou county was out at Humbug Creek and was filed on by a party ten miners eighty years ago.

Their claim reads: "To whom it may concern. Take notice that we the undersigned, did on the 27 day of November, 1851, take up a claim for each one of us, all forming a company f 10 being altogether fifteen hundred feet or one hundred fifty feet for each man on a certain quartz lead situated in Siskiyou Co., Calif., on the lower or east side of the first small creek which runs into the north fork of Humbug Creek, parallel with and above the Middle Fork commencing at a point on said lead opposite to a large fir tree where we posted our notices on that date below and near said lead, about 300 yards up the mountain from the creek on the right hand side of said small creek—far enough to include ten claims or 1500 feet.

At the time we took up these claims no part of the lead which we claimed was open or in any degree improved and we did then proceed to pen and work upon the lead and have since employed hands and made the required improvements to hold said claims.

Signed: Charles McDermitt, R. M. Martin, H. G. Ferris, W. T. Smith, I. N. Horn, D. D. Colton, I. N. Ralston S. B. Shumway, John Meshaw, Truman Smith.

This calim was taken out in fifty two, and for two years other claims were recorded which are of a similar nature, and show nothing but a peaceable disposition on the part of the miners.

Two years later there is recorded the story of a meeting which shows that considerable feeling had arisen among the early miners. They evidently felt the need of some special law and took the matter into their wn hands for we find this record: "A mass meeting of the miners of Canal Gulch was held Feby. 1.—On motion of a committee the following gentlement, Joseph Hutchins, Andrew McCrmick and James Currell were appointed to draft resolutions for the better government of the mines on said gulch. The committee reported and the following resolutions were unanimusly adopted.

Whereas— the miners of Canal Zone Gulch are deprived of the water that flows down the original channel, in consequence of a ditch constructed for the purpose of conveying the water to other portions of the mines.

Resolved. 1 That we do not recognize and ditch company's right to the water for the purpose of conveying the water to other portions of the mines, where the miners of Canal Gulch are deprived of working their claims".

The resolution then goes on to say that the miners will use the water to wrk their claims to the better advantage and that they will defend the same. They do not state in just what manner they will defend their right but they certainly gave offenders fair warning. They further resolved that any miner wishing to prospect on said gulch or its tributaries should call upn miners to be shown each boundary line so as to enable prospectors to select a claim. They also decided that all disputes arising from the working of all claims should be decided by arbitration of the miners of the gulch. This was signed by James Herd, President, and E. S. Hunter, Secretary.

Affairs were evidently peaceful for a while but in another two years another mass miners meeting was held in 1856. At that time the principal matter of discussion related to the size of the claims. They were enlarged from 150 feet in length to 300 feet and 150 feet in width. No person was entitled to stake more than one claim, but he might "succeed to as many claims as he might obtain by fair and bonafide purchase p,roviding he keep them represented by a person working each claim according to former provision." At this meeting it was also decided that "No person's claim shall be jumpable in this district while he is sick or in any other way disabled from working, or while he is absent from his claim attending upon sick friends."—Siskiyou Times.

TYRRELL REMNISENCES OF MONTEZ AND CRABTREE

Out of Grass Valley's romantic past, colorful characters and dramatic episodes have been woven into an article of more than usual interest in the current number of Motor Land, the Pacific Coast magazine of motoring published by the California State Autmobile Association. James C. Tyrrell, Grass Valley hotel man, is the author of the article, which is entitled "Grass Valley Memories."

Tyrrell has written a story that is an engaging piece of reminescence. Its publication in Motor Land brings the attractive historical associations of Grass Valley and the adjacent country to the attention of more than 93,000 motoring families in Northern and Central California.

Among the famous personalities of early California mining days dealt with in the article are Lotta Crabtree and Lola Montez. Photographs of the dwellings once occupied by the two, and which are still standing, are used as illustrations. Tyrrell also devotes considerable attention to the discovery of gold bearing ore in this region by James McKnight, and the boom period which followed.

Tyrrell's article is of a kind that should awaken new interest among motor tourists in the historic features of the Grass Valley region.

DRIFTING BEING DONE QUARTZ MOUNTAIN MINE

Sutter Creek Calif. July 16—A full face of $25 a ton gold ore, it is stated, is being followed by an east drift recently started on the 50-foot level of the 175-foot incline shaft on the Quartz Mountain property, four and a half miles northeast of this town, which is being operated by Anderson Callison and James R. Murphy, under the direction of the latter. Some of the ore being extracted yields assays running several hundred dollars to the ton.

Ed Boland of this town and associates have acquired, under lease and bond, from Mrs. Mary Fitzgerald a 400-acre tract of placer gravel land adjoining on the east the Battle Mountain mine of the Lagomarsino Brothers near Volcano, which recently has been the scene of unusually rich placer gold finds. A crew of miners is continuing to bedrock an old 72-foot vertical shaft sunk on the property several years ago. It is estimated that the objective point should be reached with 50 feet of additional shaft work.

The task of unwatering the 220-foot vertical shaft on the Ballard mine, four miles north of Plymouth, has been completed by Franklin & Company, Los Angeles mining operators, who recently resumed the development of the property under a sub-lease on the northern half thereof, embracing 80 acres. Two promising orebodies have been revealed on the 200-foot level and their further exploration is now under way.

CAMPTONVILLE ITEMS

A farewell party was given Mrs. Maud Smart and family Monday evening at their home on Main St., prior to their leaving the community after being members for the past three years. Mrs. Smart has been teching the primary department in the Camptonville Union Grammar School, and it is with regret that the District has to lose her services, due to the teachers tenure law. She has given excellent service and satisfactin in hr school work, and been an ardent worker in anything that came up fir the benefit of the community.

The forewell party was given by the Sunday School, sponsored by Mrs. Kate Hope Livingston and Mrs Julius E. Pauly. A delightful evening was enjoyed followed by refreshments of ice cream and cake. The following were present: Mrs. Maud Smart, Florence Smart, Rose Marie Smart, Laverne Smart, Jimmie Halkyard, Queen Greeg, Warren Pauly, Leland Pauly, Livingston Cloman, Dorothy Hays, Mrs Kate Hope Livingston, Mrs. J. E. Pauly.

Supervisor W. J. Mellon and Joe Vierra of Challenge, were in town Thursday on offiical business.

Dr. Minnie Leach of Berkeley came in on the Nevada City stage Thursday afternoon.

Mrs. Jos. Lavezzola and daughter who have been visiting relatives here left Thursday for her home at Downieville.

Mrs. Kate Hope Livingston motored to Sacramento Thursday.

A fire broke out in the Moonshine section Thursday morning but was quickly put out by the local Forest Service Department.

W. A. Stansberry motored to Sacramento Thursday.

Fred J. Harges of Newcastle was in town Thursday morning and motored on to Downieville.

Mr. and Mrs. Mark Sawrie and party of San Francisco were in town Thursday.

W. H. Cartwright and son, Floyd of Grass Valley were in town Thursday from Sacramento enroute to the upper country.

Dave Hunphrey has purchased a new touring car of popular make to use in transporting the school children from Mill Creek to town.

Alvin Kennady of Oroville arrived Friday on a vacation visit.

Mrs. Kate M. Williams and family moved to town Thursday from Bircville and will reside here, Mrs. Williams teaching in the local schools.

James Southerland of Goodyears Bar passed through town Friday.

Louie Latrelle of San Francisco passed thru town Friday enroute to Downieville on a short vacation.

Joseph Bachels of Goodyears Bar passed thru town Friday enroute to his home from Nevada City.

Mr. and Mrs Julius E. Pauly and sons, Erle, Warren and Leland left Friday for a week end visit at Mohawk.

Mrs. Maud Smart and family left Thursday for Nevada City where they will reside after having lived here for the past three years.

W. Parker Lyons of Pasadena renounced envelope collector, was in town Wednesday.

Forset Ranger F. W. Meggars made a business visit to the Alleghany section Thursday.

Ed Stambaugh of Nevada City was in town Friday.

Mr. and Mrs. Earl L. Cleveland arrived Friday evening from Sacramento to spend the week end with relatives.

Miss Lesta H. Joubert left last week for Alaska where she will spend several weeks vacationing.

Chas. H. Greene of Grass Valley was in town Friday.

Fred J. Joubert motored to Downieville Thursday.

Sheriff Dewey Johnson and Deputy Wm. Carter of Downieville were in this section Wednesday on official business.

LASSEN PARK READY FOR DEDICATION

The extraordinary plans for the dedication of Lassen Volcanic National Park are being rounded into shape and every effort is being made to take care of the huge crowds that will be present.

The roads within the park boundaries are bing graveled and oiled. A large dance platform is being erected, rest rooms established, parking space cleared and concession booths, tables and platforms being rushed to completion.

The Raker Mounment will be erected at the Mineral entrance to the park and the unveiling of this monument by Congressman Harry L Englebright will mark the official opening of the dedication ceremonies. The drive from this gateway to Manzanita lake is said to be one of the most scenic routes in the world.

A platform is being built at King's Meadows where the official ceremonies will be conducted. Secretary Wilbur and other governmental officials of Washington will be present, as will also Governor James Rolph Jr. and other western governors.

Sunday, the imitation of Mt. Lassen in eruption will take place. This consists of a huge volume of smoke manufactured from powder used by the government armies and navies in providing a smoke screne during time of war. In the evening, one of the most beautiful and extensive pyrotechnic displays ever witnessed will be staged on the top of the mountain. This will conclude the three day dedication.

No charge will be made to any one entering the park during the celebration.

BUILDERS OF CALIFORNIA

But for Him . . .

wheels would stop . . . homes go dark

Lightning strikes in the mountains. A high-voltage line goes out! But your service must not fail. It is up to the LOAD DISPATCHER . . . Reports flash by wire and radio. Men spring to action. Instantly, new current is cut-in. And you are serenely unaware of the crisis that might have plunged cities into darkness.

So dependable is today's electrical service that we seldom consider the factors which make it possible:

Vision, courage, engineering genius—and the constant vigilance of 33,000 workers.

California power companies, with widespread organizations and a *billion-dollar* investment, make effective use of Bank of America's unique service.

At 133 Bank of America branches in 117 cities, district offices deposit the checks and cash received from consumers.

Thus millions in funds flow through the Bank's statewide system to power companies—then back to California business concerns for equipment and supplies; to California workers for wages; to the state for taxes, etc.

Power companies, employes, consumers—all profit by Bank of America's assistance in financing industries, agriculture and homes. For this Bank's facilities help California to grow—help all of us to enjoy such conveniences as modern electrical service.

ALL of the 8 largest power companies in California are depositors in Bank of America

EASTERN STATES METAL VALUES QUOTED

The mines in the Eastern States yeilded metals in 1930 valued as follows: Gold, $46,637; Silver, $47,582; Copper, $4,970,164; Lead, $836,700; and Zinc ,$18,126,878, according to the United States Bureau of Mines, Dpeartment of Commerce, There were increases in the quantity of all five metals, but decreases in the value of the silver, copper and zinc, compared with 1929 The producing mines reporting in 1930 were 7 placers and 17 lode mines.

The value of the gold increased from $36,793 in1929 to $46,637 in 1930. The placer gold reported amounted to $1,686 and was derived from seven small operations in Alabama, Georgia and North Carolina. Placer mines in North Carolina yielded $994 Lode mines operating in the Eastern States in 1930 yielded $44,951 in gold, of which $3,925 was from Georgia, $13,588 from North Carolina, $13,023 from Pennsylvania, and $14,388 from Tennessee. Dry and siliceous ore milled in Georgia and North Carolina yielded a recovery of $6,740 in gold; copper ore from North Carolina and Tennessee wielded $25,188; and the pyritiferous magnetite ore from Pennsylvania yielded $13,023. The gold recovered from base ores in 1930 was about seven times as much as that derived from placers and lode gold ore.

The total production of silver was 123,590 ounces, of which 10 ounces was from placer bullion 70 ounces from siliceous ore, 117,748 ounces from copper ore mined in Tennessee, North Carolina, and Vermont, and 5,762 ounces from copper concentrates shipped from Pennsylvania. The mine production of copper increased from 34,045,920 pounds in 1929 to 38,232,031 pounds in 1930. The production of copper in 1930 came from the Fontana and Cullowhee mines in North Carolina, the properties of the Ducktown Chemical & Iron Co., and the Tennessee Copper Co., in Tennessee, the Cornwall mines in Pennslyvania and the property of the National Copper Corporation in Vermont.

The lead shipped in 1930 was from the Austinville mine of the Bertha Mineral Co. in Virginia, the Balmat mine of the St Joseph Lead Co. in New York and the properties of the Embree Iron Co. in Tennessee. The output was much larger in 1930 than in 1929.

The mine production of zinc in the Eastern States increased from 309,096,000 pounds in 1929 to 336,488,000 pounds in 1930. The New Jersey Zinc Co's mines in New Jersey were the largest producers, but the increase in 1930 was due to operations at the Austinville mine in Virginia, the Universal Exploration Co. property in Tennessee, and particularly to the opening of the Balmat mine of the St. Joseph Lead Co. in St. Lawrence County, New York

The total quantity of zinc ore mined and milled in the Eastern States in 1930 was 1,613,313 tons, that ofcopper ore 915,358 tons, and that of pyritiferous magnetite ore (which yielded 6,121 tons of copper concentrates) 1,001,324 tons. There was a large quantity of lead-zinc ore milled and only about 900 ton of siliceous ore.

$100 REWARD OFFERED FOR CAPTURE INCENDIARISTS

Sacramento, July 16—With one state forest employee killed and several others injured fighting man-caused fires, a standing reward of $100 was offered today for the arrest and conviction of any person who maliciously sets a field or forest fire in California.

The reward, offered by the California Fire Emergency Committee, will be paid to private citizens and not to forest employees of the state or federal government.

This action which has the approval of Governor James Rolph Jr., is destined to bring to justice persons who apply the torch to range or forest land. Several persons in Northern California have already been convicted of starting fires that swept over large areas and caused thousands of dollars in damage.

"Although the California Fire Emergency Committee is receiving splendid cooperation from all parts the state," said State Forester M. B. Pratt, executive secretary of the committee, "there are a few cases of misguided individuals who, thru a spirit of viciousness, thoughtlessness or revenge, wilfully light fires Such fires not only do heavy damage endanger life and property, but also cripple the forest patrol when it is badly needed to fight fires resulting from unpreventable causes."

"We are inviting justices of the peace to cooperate fully with local forest officials in weeding out such offenders. We have instructed all our forest supervisors that before leniency may be recommended in the case, they must first obtain approval of the state division of forestry."

Public cooperation alone can stamp out man-caused fires in California, the state forester believes. An aroused citizenry will report to police officials every case where a fire is maliciously started, so the culprit may be brought to justice.

"It is hoped that county boards of supervisors will match the $100 reward", he continued. "This cause of fire will be eliminated only when every person realizes that it is his duty to his state to report such cases."

OROVILLE BANKS HANDLE GOLD AS IN OLD DAYS

Reminiscent of the days of '49 Oroville banks are handling an increased business today in the purchase of gold

For gold panning is coming into its own again.

The black sand in the bottom of the pan isn't yielding great values, in most instances, but the snipers are getting enough to buy beans and a slab of bacon in times when jobs aren't hanging on Christmas trees.

The pokes of gold don't create a fever of excitement. For the amounts brought to the banks are often as small as 75 cents at a time. Sometimes they reach $1.50 or three or four dollars. Less often there is $10 or $20 worth of fine or coarse gold pushed through the teller's window.

And up and down the streams the men are busy with pan, rocker and sluice box.

Sale of gold pans and prospecting equipment has increased to a marked degree since the first of the year. One hardware store has sold five times the gold pans that normally have been disposed of. Apparently Oroville isn't the only city where men have resorted to the search for gold to keep the frying pan sizzling. When a local hardware store asked their jobber in Sacramento to rush more gold pans they received the answer:

"I'm sorry, but we're all out."—Oroville-Mercury.

PROGRESS AT DENISMORE

Sonora, Calif., July 16— Good progress is being made by Gus Ogden of this town and associates in the preliminary work incident to the renewed development of the Densmore mine, two miles north of Columbia, recently purchased by them from Crittenden Hampton of Sonora. They are cleaning out a 380 foot drift tunnel for the purpose of continuing the exploration of a vein varying in width from one to ten feet, that 25 years ago yielded an average of $40 a ton in gold it is stated. The working to be resumed gives a vertical depth of 300 feet on the orebody.

For a distance of 147 feet, a drift tunnel, with crosscuts at intervals has exposed an orebody ,having an average width of nine feet, and yielding assays ranging from $6.50 to $15., a ton in gold, on the Mark Twain property on Jackass Hill near Tuttletown. The work is being done by the owner, X. O. Howe of Sonora, and is designed to tap orebodies which gave rich returns on the surface in past operations The property adjoins a group of claims, including the Bell mine, which was recently taken over under lease and bond by James B. Halbert and associates of Los Angeles.

OROVILLE MINE FETE IS TO BE PUBLICIZED

Oroville, July 13, 1931— Announcement was made by Mabel Hale and Richard Buhlis, the first representing the California Mining Journal and the latter as field secretary of the Mining Association of California, a statewide publication, published in the sole interest of the mining industry of California, to the effect that the Journal will publicize the 1932 State Mining Celebration to be held in Oroville to its utmost capacity.

It is not to be overlooked that even today with the gold mining industry of the state at low tide it is one of the leading gold producing sections of the United States and ranks first in our national gold production.

—0—

Mrs. Charles Genasci of Willow Valley is spending a few days in Sacramento.

Mr. and Mrs. Wade Armstrong are home from a few days spent in San Francisco.

LASSEN MAIL GIVES MINE NEWS OF INTERST

The Diamond Mountain Mines Inc. expect to begin clearing the ground for the erection of a fifty ton mill next week. The tunnel now being driven is in 345feet, the vein at this point being ten feet wide with an assayed value of $8 per ton The development work is approaching an intersection of four veins where it is expected that very rich values will be uncovered.

The company has 200,000 tons of ore now ready for themill and has a mineral area of 3000 acres to draw frim in addition to thepresent location.

Conditions at the Honey Lake Valley Gold mine continue favorable and show every promise of bearing out the statements made by its promotors. This company is also preparing to erect a mill and start actual operations in the near future.

The development of these two mining sections will prove of immense value to Lassen county and particularly to this vicinity. It has been known for many years that Diamond Mountain carries much mineral, but up to the present time the nearest successful operation has been Engel's mine on the south side This mine has proven of great value to its owners and it is believed that an equally valuable mineral belt lies on the north side.

SEAWELL EXPLAINS BILLS

This is the seventh of a series of articles of explanation of bills introduced by Assemblyman Seawell and passing both houses of the Legislature.

Due to the census of 1930 it was necessary for the Legislature to reclassify the fifty-eight California counties as to population.

Placer County is now a County of the 31st class showing a gain in population.

Nevada County is now a county of the 43rd class showing a loss in population. It having been previously a county of the 39th class.

Lassen County is now a County of the 39th class having replaced Nevada County as to classification with Nevada County taking Lassen County's former classification.

Plumas County is now a County of the 49th class showing an increase in population.

Sierra County remained stationary as a County of the 56th class

Following the passage of the Classification Bill it was necessary for me to introduce nineteen county government bills changing the classifications of my several counties. This meant that every County Official's Office had to be revised as well as those officials working under the General Laws of the State. Any change in the regular County Government Act is made at the combined suggestions and recommendations of the County Board of Supervisors and Current Grand Jury.

The legislative representative incorporates into the laws these recommendations and they are not made or sponsored by him but by the local County Government representatives. These bills were all signed by the Governor and after August 14th, the counties will operate under the new law.

In the fiscal analysises I passed twenty-five bills and resolutions during the last Session which were all signed by the Governor. I, also, find that I rank tenth on the list in having bills passed and signed by the Governor in both Houses of the Legislature which consists of 120 members.

I trust that this information regarding my activities during the last Session has been of some interest to the people of the district and that they have a partial knowledge of what I did as their representative.

LEGAL NOTICE

No. 5912

NOTICE OF SHERIFF'S SALE OF REAL ESTATE, UNDER EXECUTION

IN THE.. SUPERIOR.. COURT OF THE STATE OF CALIFORNIA IN AND FOR THE COUNTY OF NEVADA.

JAMES BRADY, Plaintiff
vs.
M. IVAN DOW AND E. L. DOW, Jr., Defendants.

By virtu of an Execution issued out of the Superior Court of the State of California, in and for the County of Nevada, wherein James Brady is Plaintiff and M. Ivan Dow and E. L. Dow Jr., are Defendants. Upon a Judgment rendered on the 6th day of July, 1931, for the sum of Four Hundred Thirty-eight ($438.00), with interest thereon at the rate of 7 per cent per annum, till paid from the date of said Judgment, together with Twelve ($12.00) costs and disbursements at the date of said Judgment, and Clerks accruing costs of One Dollar ($1.00).

I have this day levied upon all right, title, estate and interest of M. Ivan Dow and E. L. Dow Jr., defendants, as aforesaid, in and to the following described real property to wit;

All those certain consolidated quartz and placer mining claims, being portions of Section Seventeen (17) and Twenty (20) Township Sixteen (16) North, Range (9) East, M. D. M., bounded and particularly described as follows; Commencing at the section corner common to Sections 16, 17, 20 and 21 of said Township, thence running South 88½° West following section line between said Sections 17 and 20, 16.81 chains thence North 55½° West 28.80 chains to post M. H. R. 12; thence South 64½° West 8.20 chains to post M. H. R. 14; thence North 74° West 4.86 chains to post M.H. R. 15; thence North 56½° West 4.49 chains to post M. H. R. 16; thence North 48° West 6.00 chains to post M. H. R. 17; thence South 49° 4.90 chains to post M. H. R. 1; thence south 11½° East 3 chains to postM. H. R. 2; thence South 13° West 8.16 chains to Post M. H. R. 3; thence South 9¾° W. 4.20 chains more or less to point 25 feet North of the croppings of Nolan's Nevada Ledge; thence North 70¾° East at 9.60 chains Post M. H. R. and B. C. 3, 12.02 chains to point on East side line of Nevada Q. M., South 23° East 0.73 chains to East Lode Post of Nevada Quartz M; thence South 15° 38' East 2.24 chain to North side line of Big Blue Q. M., thence South 68° West 5.82 chains to N. W. corner of Big Blue Q. M.; thence South 22° East 0.76 chains to S. W. Corner of Big Blue Q. M. thence North 68° East 5.76 chains to East end line of Nevada Q. M., thence South 15° 38' E. 1.86 chains to Section line between Sections 17 and 20; thence North 88½° 5.62 chains to the NW. Corner of the Nute Placer Mine; thence South 2° West 12.75 chains, thence South 45° 27' East 10.04 chains to post M. H. R. 6; thence North 88½° E 40.86 chains more or less to post M. H. R. 9; the line between sections twenty and twenty-one and thence North 0° 45' W. 20.45 chains more or less to the place of beginning. Also all those certain Placer and Quartz Mining Claims commonly known as the Sharp Consolidated Mining Claims and consisting of both Quartz and Gravel and known as the Greenman, Butterfly, Ben Harrison, Glencoe, Hickson, Enterprise. Little Kellog, and Red Rose Claims, and for a more particular description of the above named cleaims reference is hereby made to the Nevada County Recards in Book and pages as follows:

Greenman, Book 26, page 195, Kellog, Book 26, page 196, Rose Claims, Book 126, page 195, Enterprise, Book 24, page 68, Hickson, Book 24, page 69; and Ben Harrison, Book 19, page 161; meaning and intending to convey all the right, title and interest that the said Sharp, his heirs and assigns have or may have to the above described property, together with all personal property and improvement located thereon.

For further description of the above mentioned placer and quartz consolidated claims see Book Deeds 131, page 309, Nevada County Records, and including all water rights, ditches, machinery tools, timbers set upon or connected with or appurtenant to said premises or any part thereof; it is intended hereby to include all patented or unpatented quartz and Placer Mining Claims owned or claimed by the Grantor in Nevada Township, Nevada County, California.

Including all buildings and improvements tereon, or that may be erected thereon; together with all and singular the tenements, hereditaments and appurtenances, water and water rights, pipes, flumes and ditches thereunto belonging or in anywise appertaining and the reversion and reversions, remainder and remainders, rents, issues and profits thereof.

Together with all and singular the tenements, hereditaments and appurtenances thereunto belonging, or in anywise appertaining, and the reversion and reversions ,remainder and remainders, rents, issues and profits thereof.

Public Notice is hereby given that I will on Friday, the 31 day of July, 1931, at 10 o'clock A. M. of said day in front of the Courthouse door in Nevada City, County of Nevada, State of California, sell at Public Auction for cash, lawful money of the United States, all the right, title claim and interest of the above named defendants, of, in and to the above described property or so much thereof as may be necessary to satisfy said Judgment and costs, etc., to the highest and best bidder for cash lawful money of the United States.

Dated: July 10th, 1931.
GEORGE R. CARTER, Sheriff of Nevada County.
E. H. Armstrong, Attorney for Plaintiff.
First Publication July 10, 1931.

SUMMONS

NO. 5928

In the Superior Court of the State of California in and for the County of Nevada.

ANNA LUTHER, Plaintiff,
v.
JOHN JOHNSON; ELIZABETH E. TARR; also, all other persons unknown claiming any right, title, estate, lien or interest in the real property described in the complaint adverse to plaintiff's ownership ,or any cloud upon plaintiff's title thereto, Defendants.

Action to determine adverse claims to and clouds upon title to real property, brought in the Superior Court of the State of California in and for the County of Nevada, and the complaint filed in the office of the Clerk of said County of Nevada.

NILON, HENNESSY & KELLY, Attorneys for Plaintiff, Grass Valley, California.

THE PEOPLE OF THE STATE OF CALIFORNIA SEND GREETINGS TO:

JOHN JOHNSTON; ELIZABETH E. TARR; also, all other persons unknown claiming any right, title, estate, lien or interest in the real property described in the complaint adverse to plaintiff's ownership, or any cloud upon plaintiff's title thereto, Defendants.

YOU ARE HEREBY directed to appear, and answer to the complaint in an action entitled as above, brought against you in the Superior Court of the State of California in and for the County of Nevada, within ten days after the service on you of this summons—if served within this County,—or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint as arising upon contract, or she will apply to the court for any other relief demanded in the complaint.

The following is a statement of the object of the action:

The object of the action is to determine all and every claim, estate, right, title, lien or interest in the property herein described; that the plaintiff is now, and has been, by herself and her predecessors in interest, the owner of and in the actual, exclusive and adverse possession of the property hereinafter described continuously for the period of more than twenty years immediately preceding the filing of the complaint in this action, claiming to own the same in fee against the whole world, and that plaintiff has, by herself and by her predecessors in interest, paid all taxes of every kind and nature whatever, levied or assessed against said real property during the period of five years continuously immediately preceding the filing of complaint aforesaid; that the claims or claim of said defendants is without right, and that they have not, nor has any, or either of them, any right, title, estate, lien or interest in said real property or any part or portion thereof.

The land and property affected by this action is:

All that certain real property situate in the City of Grass Valley, County of Nevada, State of California, and bounded and particularly described as follows, to wit:

All that portion of Lot 9 in Block 27 of the Town, now City, of Grass Valley, as said lot and block are designated upon the official map of the Town of Grass Valley made by Samuel Bethell in the year 1872, and more particularly described as follows, to wit:

Beginning at the South East Corner of Lot 9, on the North line of Neal Street of said City of Grass Valley, from which the South West corner of Lot 8, the intersection of the East line of Mill Street and the North line of Neal Street, bears N 57° 18' W at the distance of 208.11 feet; thence N 22° 34' E along the line between lots 9 and 10, 66.89 feet to the corner common to lots 9, 10 and 12 of said Block 27; thence N 18° 14' E along the line between lots 9 and 12, 47.14 feet to the North East corner of lot 9 on the West line of lot 12; thence N 67° 56' W along the line between lots 9 and 6A, 38.50 feet; thence S 23° 47' W 105.73 feet to the Northerly line of Neal Street; thence S 57° 18' E along the Northerly line of Neal Street to the place of beginning.

GIVEN under my hand and the seal of the Superior Court of the State of California in and for the County of Nevada, this 15th day of May, A. D., 1931.

R. N. McCORMACK, Clerk.
By ..... Deputy Clerk.

PAST PRESIDENTS TO ASSEMBLE AT SKI COURSE

A joint meeting of the Fred H. Greely and John A. Sutter Assemblies of the Past Presidents Association of the Native Sons of the Golden West will be held in the club house of the Nevada City-Grass Valley Ski Club at the historic Central House on the Tahoe-Ukiah highway 10 miles east of Nevada City, next Saturday night.

There will be a joint installation of the officers of the two assemblies and an initiation of candidates to membership in the Native Sons of the Golden West, the initiates becoming members of the various parlors who will bring them for the big meeting.

A number of prominent members have promised to attend among them being Hilliard E. Welch, past grand president of the Order.

Plans will also be discussed at the meeting for a marker or monument at the Lone Grave which is located near the Central House. One model has been receivd from a sculptor. It is being developed according to the ideas of the committee, and it is to be hoped that they will succeed in securing a model that satisfies them and that this splendid project of the organization will be accomplished.

The monument will represent the struggles or sacrifices the pioneers made.

In 1858 the body of little Julius Apperson, son of emigrants in a pioneer party, was interred, in a shallow grave and a rude board monument was placed at the head of the grave. Two small cedar trees were planted, one at the head and one at the foot of the grave. The trees grew and are great trees standing silent watch over the last resting place of the little body.

Temporary markers are to be placed where historic or outstanding events have taken place, such as stage robberies, murders, bandit killings. Among the spots proposed at the present are the site of the killing by Steve Venard of three bandits in 1866; the Cummings holu up and murder site, the spots where Sylvia Gallivotti, Arthur Meyers, Sheriff D. F. Douglass and others gave up their lives to holdup men. These markers will arrive Saturday and are to be placed Sunday.

The Fred H Greely Post Native Sons of the Golden West, are doing splendid work along the lines of preservin g old buildings, erecting markers and marking historic spots preserving them for future generations.

A camp stew is to be prepared and served to the large crowd expected.

GOOD GAME OF BASEBALL TO BE PLAYED SUNDAY

Local baseball fans have a chance to see a good baseball game Sunday afternoon when the Browns Valley aggregation comes to Nevada City to play a return game to one played earlier in the season at Browns Valey when the Blues walked off with a win. Since the game played with the Blues Browns Valley has built up a strong team so the Blues are looking for a hard game Sunday afternoon.

The Blues will use the same lineup that has been responsible for the eight games they have won this year and should make a good showing Sunday.

The lineup is:

Hoskins, cf; Tamblyn, 2b; S. Wasley, ss; L. White, lf; Joe Sbaffi, 3b; T. Wasley, rf; Polglase 1b; Rolando, c; and White p.

LOCAL HAPPENINGS

Mrs. W. L. Mobley and daughter, Miss Elaine, are spending their vacation at Santa Cruz.

Mrs. Ragland Tuttle has sufficiently recovered from a recent illnes to return to her home. This is good news to her many friends.

M. T. Ayers, publisher of the Mountain Messenger at Downieville returned to his home Sunday. He accompanied the newspaper men on the Pacific Gas and Electric Excursion to some of the comparatively big projects.

H. Meyers of Cherokee was a business visitor this week.

N. B. Bishop of French Corral was a visitor early in the week.

Ed Weisenburger, who left here 37 years ago for San Francsco has been spending a few days here renewing old acquaintances. He was accompanied by his daughter.

Charles Corey and Mr. Wayne, resident engineer of the State of California, motored up on the Yuba river banks Sunday and caught the limit of nice fish. Mr. Corey makes fish flies for all occasions and this is the reason he is able to catch a limit each time he goes out.

GRASS VALLEY PERSONALS

Miss Frances Seymour of the J. C. Penney Company, has returned from San Francisco, where she spent her vacation.

Mr and Mrs. Ed Covey of Grass Valley spent last week's end in Reno.

Mr. Chas. Rayburn of the Earl Fruit Company, spent the day in Grass Valley on business.

Mr. and Mrs. Ray Whitburn of the Head Office of the Bank of America, are spending their vacation with friends and relatives in Grass Valley.

WARDEN SHARP SOON PUTS OUT FIRE NEAR GRASS VALLEY

At about two o'clock Monday a fire broke out on the Tahoe-Ukiah Highway west of Grass Valley. About ten acres were burned in all four acres of grass, and six of timber. No damage was done to any extent. A cigarette was the cause of the fire according to the warden.

FELICANA MINE TO SINK TO LOWER LEVEL

Equipment has now been installed on the 375 foot level in the Feliciana Mine in Mariposa county to sink a winze to a lower level, it was reported by officials of the Gold Ledge Mining Company here. The latter company owns full control of the Feliciana property. Development of the high grade ore shoot recently discovered on the 375 foot level will be resumed immediately.

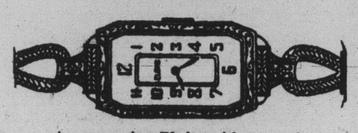
Samplings taken from the present bottom of the winze showed values ranging from a few dollars to more than $40 per ton before work was was delayed pending the installation of equipment.

The company's mill has been operating intermittently during June on ore taken out in the course of development. Although a general cleanup has not been made as yet, company officials estimate that the gold recovery from development work alone will about defray the mine's expenses for the month. A considerable increase in gold recovery is expected during July, and engineers hope to have the mill operating on a full-time schedule between August 15 and September 1.

Engineers for the company are now arranging for some small changes in milling practice which will make possible more complete recovery of gold values from the ore particularly from the heavy sulphide ore encountered above the 375 foot level.

Mr and Mrs. S. Messini of San Francisco were recent visitors at the home of her aunt, Mrs. Chas. Guenther.

Take an ELGIN on your Vacation this easy way



An attractive Elgin with a cord. Engraved case $25

It is no task at all to pay for an Elgin watch when you buy it with our modern finance plan. Just a small down payment and you may take with you any Elgin in our store. The balance will be arranged at regular intervals at no extra charge. Come in today.
